# ICETT - INTERNATIONAL COOPERATIVE ENTREPRENEURSHIP THINK TANK

International Cooperative  
Entrepreneurship  
Think Tank - ICETT

## ABOUT ICETT

The International Cooperative Entrepreneurship Think Tank (ICETT) was formed in 2018 by the ICA to boost cooperatives' entrepreneurial performance. Through innovative ideas, research, education, and cooperation, its members address the global challenges that cooperative enterprises are facing today.

## OBJECTIVES

ICETT's objective is to serve as a strategic hub that provides members with valuable information to strengthen cooperatives' competitive advantage, positioning the cooperative movement as a key actor in the implementation of the Sustainable Development Goals.

### How do we do it?

Providing a space for debate and exchange

Promoting business cooperation

Leveraging cooperative entrepreneurship

Inspiring youth cooperative entrepreneurship

## THEMATIC AREAS

ICETT is structured into four working groups that implement ICETT activities. Working groups collaborate and find innovative ways to stimulate cooperative entrepreneurship, based on thematic areas that have a great social, economic and environmental relevance inside and outside the cooperative movement today.

- **Future of Work - SDG8**
- **Human Rights in Value Chains - SDG 12**
- **World Cooperative Monitor (WCM) and Climate Action - SDG 13**
- **Cooperative Identity as a Key Competitive Advantage**

Through its thematic areas, ICETT carries out additional research and organises debates, events, and projects to foster innovative approaches. This demonstrates how cooperatives can leverage their identity to boost their entrepreneurial performance.
